ACTIVATED CARBON CARTRIDGE

PART #S7025

This cartridge is designed for the removal of chlorine, tastes and odors from safe potable drinking water supplies.

The cartridge should be changed approximately every six months or when objectionable tastes or odors return.

CAUTION: This cartridge will not remove or kill bacteria and should not be used on microbiologically unsafe water.

MADE IN USA

O-rings up for proper installation.

Refer to owner's manual for proper disinfection instructions when changing filters.
